

# BUYER BEWARE...

**DO NOT LET THIS HAPPEN TO YOU...**

*"Why are there so many brown areas in my yard? Who would think I would be dragging hoses around after installing a sprinkler system. This is what I get for cutting costs."*

## REMEMBER...

Check head count and references before you hire your sprinkler company. Improper design can cost you thousands of dollars in future renovation to your system.

**MORE HEADS...  
BETTER DESIGN**

*"I am so glad we used American National and their text book design with head to head coverage. The grass looks fantastic. They were actually a better value based on their head count."*

**Installation one time... Satisfaction for a lifetime!**

## To evaluate your bid properly

it is important to review head counts and references. We have overhauled numerous systems our competitors recently installed, therefore costing the homeowner thousands of dollars. **Fewer heads installed equals less coverage and thus a cheaper price.** We do not install less heads or zones to cut costs. At American National, we use text book irrigation design based on head to head coverage.
